Career Objective

Hello there. I'm a **Flutter developer.** I've been practicing in the industry for the last one and a half years, during which time I developed high-quality user-oriented applications efficiently. I'm passionate about delivering seamless, cross-platform experiences. I have a deep understanding of the backend, state management, and responsive design. My other skills are SEO, Web development, and Lead generation. I pride myself on doing quality work and maintaining great communication.

I want to join a creative team where I could be able to learn more, apply my experience, and make a great difference in the development industry.

Projects

1. **ChatBot Ai | [Link](#)**
   - Developed an AI-powered chatbot similar to Gemini.
   - Implemented user authentication using Firebase for secure access.
   - Integrated both light and dark mode themes to enhance user experience.
   - Utilized Provider as the state management tool for efficient app state handling.
2. **E-Commerce | [Link](#)**
   - Developed an e-commerce app enabling users to browse, search, and purchase
   - products.
   - Implemented cart and wishlist functionalities for personalized shopping
   - experiences.
   - Integrated Firebase authentication for secure user accounts.
   - Implemented GetX and Provider for dynamic and effective state management
   - across the application.
   - Utilized Sqlite as a local database to ensure seamless offline access and data
   - persistence.
   - Applied advanced animations to enhance UI interactivity and user engagement.

3. **E-Wallet App | [Link](#)**
   - Developed an e-commerce app enabling users to browse, search, and purchase
   - products.
   - Implemented Firebase authentication for secure user login and
     registration.Enabled users to send, add money, and view transaction history.
   - Utilized GetX for state management to ensure smooth and responsive user
   - experience.
4. **Covid Tracker App | [Link](#)**
   - Developed a COVID tracker app displaying real-time stats, including total deaths,
   - recovered, and total cases.
   - Integrated data for all countries with search functionality by country.
   - Implemented shimmer effects, animations, and charts for a dynamic and
   - informative user experience
5. **Todo App | [Link](#)**
   - Created a to-do app allowing users to add, edit, and delete tasks.
   - Implemented a search feature for quick access to specific to-dos.
   - Focused on user-friendly interface and efficient task management.

Technical Skills

- **Languages**: Dart, Kotlin, JavaScript, TypeScript
- **Frameworks**: Flutter, React Native, Express JS
- **State Management**: Bloc, GetX, Provider
- **Database**: Firebase, Supabase, Sqlite
- **API Integration:** RESTful APIs
- **Tools & Technologies**: NodeJS, Git, GitHub, Figma, FlutterFlow, DhiWise
- **Design**: Responsive Design, UI/UX Design principles, Animations, Light/Dark mode
  integration

Education

Bachelor of Social Science in Economics
National University | 2026
